SUMMARY

Full-stack developer with a strong focus on front-end technologies like Angular. My main goal is to create visually appealing and user-friendly web applications that people love to use. While I'm also skilled in .NET Core and Spring Boot, I put a lot of emphasis on making sure the front-end experience is top-notch. I'm really passionate about database management and ensuring our solutions are robust and reliable. Plus, I'm always eager to learn and stay updated on the latest trends in the industry so I can bring fresh ideas to every project I work on.

EXPERIENCE

•ASSETCUES *Aug 2023 - Present*

Full Stack Developer (Angular & .NET Core) Pune

- Created and built front-end apps using the Angular framework for Asset Tracking Management software.
- Added dynamic API integrations to allow data exchange and functionality to work smoothly in the software.
- Worked closely with different teams like UX/UI designers, backend developers, and product managers to make sure the software experience was cohesive.

PROJECTS

• Visitor Management System *Dec 2021 - july 2022*

Angular,Material UI,.NET Core

- Visitor Management System typically refers to a structure to keep track of visitors' activities in organizations and public buildings. It can provide necessary output and information to the user and record the incoming and outcoming visitors within the shortest time.
- My project was a college submission, so I had to carry out all the responsibilities of front-end using angular.

• Assettrack Solution *Aug 2023 - present*

Angular,Material UI,.NET Core

- At AssetCues Solutions Pvt Ltd, I specialized in developing a user-friendly interface for an Asset Management System using Angular and Angular Material UI.
- My role extended beyond frontend development to also include the creation and integration of APIs with .NET Core.
- This comprehensive approach enhanced system functionality and optimized asset tracking processes, ensuring seamless communication between the frontend and backend.

• HTML Converator Library For Angular *July 2024 - present*

Angular,Material UI

- Its My First Library for Angular which Converts designs into HTML code to use in websites and its Have a features like Text Formatting, Headings, Lists, Links, Tables and converter for that design into HTML code.
- This powerful and flexible editor allows you to format text, insert tables, manage lists, and much more, all within an Angular application. Packed with a sleek toolbar, this editor makes it super easy to create and edit HTML content.
